CERTIFICATIONS

Kanban System Design

AT A GLANCE

8+

years building web applications

30+

projects delivered under my leadership, 10 truly large-scale

4_y

leading my own development team

PROFILE

Fullstack engineer with 10+ years of experience; for nearly the last 4 years I led my own development agency **FIRE Systems**. At **EPAM** I spent 2 years building a **wealth management application for a major Swiss bank**, so regulated fintech environments, auditability, and security are familiar territory. I've built several larger systems from an empty repository — choosing the stack and defending technical decisions is my daily mode.

WORK EXPERIENCE

01/2023

04/2026

Prague

FIRE Systems

Founder · Fullstack & Product Engineer

- Led a small development agency, delivering custom systems from design through production, with client accountability and technical decision-making.
- AI hotline for a Prague ISP**: voice AI with backend logic orchestration, integrations, and real-world operation beyond a classic web app.
- Data platform scraping 50+ million records**, change detection, automation, monitoring, alerting, and fault tolerance.
- Several larger enterprise applications, manufacturing software, and internal tools with non-trivial data models and admin interfaces.

- STACK
- TypeScript

Prague

Strafos

Interim CTO · Senior Software Engineer

- Technology and architecture selection based on client requirements, technical oversight of product direction.
- Fullstack product development, data model design, API and backend infrastructure.

- STACK
- React
- Node.js
- Apollo GraphQL
- Hasura
- PostgreSQL
- Docker

05/2018

12/2019

Prague

NEORIS

Senior Frontend Developer

- Complete **rewrite of a large codebase (250k+ lines)**, implementing complex user flows and frontend architecture.
- Collaboration across multiple Scrum teams, building demanding UI including Arabic right-to-left layout.

- STACK
- TypeScript
- Angular 5+
- NgRx
- Stencil.js
- SASS
