Filip Hájek

AI Product Engineer · Lead Fullstack · Agentic Systems

hajek.raven@gmail.com [linkedin.com/in/hajekfi](https://www.linkedin.com/in/hajekfi) Prague

STACK

AI & Agents

- Vercel AI SDK
- Agentic systems
- Tool calling
- LLM orchestration
- Streaming
- Voice AI
- Cursor
- Agentic coding

Core engineering

- TypeScript
- Next.js
- React
- Node.js

Data & API

- PostgreSQL
- Drizzle ORM
- GraphQL
- Hasura
- REST

Delivery

- Docker
- Linux
- CI/CD
- Monitoring
- Product ownership
- Tailwind CSS

EDUCATION

2016 — 2018

Czech Technical University in Prague

Professional working

CERTIFICATIONS

Kanban System Design

AT A GLANCE

8+ years building web applications

Several larger production systems delivered end to end

4y leading my own development team

PROFILE

AI Product / Fullstack Engineer with 10+ years of experience in TypeScript, React, Next.js and Node.js. I build **production AI systems**: voice assistants, agentic workflows, tool calling, LLM orchestration, streaming and backend integrations.

Over the past 4 years, I led my own software delivery company and shipped several larger production systems, including an AI hotline, data platforms, manufacturing software and internal business applications. **I work in Cursor daily** and use agentic coding for prototyping, refactoring, debugging, testing and review, while keeping architecture, security and code quality under my responsibility.

WORK EXPERIENCE

FIRE Systems

01/2023 — 04/2026 · Prague

Founder · AI Product & Fullstack Engineer

- Led a small development agency, delivering custom systems from design through production, with client accountability and technical decision-making.
- AI development**: building production agentic systems and voice assistants on top of the **Vercel AI SDK** — LLM orchestration, tool calling, streaming, integrations, and wiring into a production backend.
- AI hotline for a Prague ISP**: a voice assistant with backend logic orchestration, integrations, and real-world operation beyond a classic web app.
- Agentic coding in Cursor**: daily development with AI assistants for faster prototyping, refactoring, debugging, testing and code review without losing engineering control.
- Data platform scraping 50+ million records**, change detection, automation, monitoring, alerting, and fault tolerance.
- Several larger enterprise applications, manufacturing software, and internal tools with non-trivial data models and admin interfaces.

STACK TypeScript, Next.js, Node.js, Vercel AI SDK, Agentic systems, Tool calling, Voice AI, Cursor, Agentic coding, PostgreSQL, Drizzle ORM, React, Tailwind, Docker, Leadership

EPAM Systems

01/2021 — 04/2023 · Prague

Senior Software Engineer

- Wealth management application for a major Swiss bank**, development in a large engineering organization across multiple squads.
- Full development cycle from analysis through implementation, review, and release, with a focus on long-term sustainable solutions.

STACK React, TypeScript, Node.js, REST, CI/CD, Git, SAFe

Strafos

11/2019 — 11/2020 · Prague

Interim CTO · Senior Software Engineer

- Technology and architecture selection based on client requirements, technical oversight of product direction.
- Fullstack product development, data model design, API and backend infrastructure.

STACK React, Node.js, Apollo GraphQL, Hasura, PostgreSQL, Docker

NEORIS

05/2018 — 12/2019 · Prague

Senior Frontend Developer

- Complete **rewrite of a large codebase (250k+ lines)**, implementing complex user flows and frontend architecture.
- Collaboration across multiple Scrum teams, building demanding UI including Arabic right-to-left layout.

STACK TypeScript, Angular 5+, NgRx, Stencil.js, SASS
